Reading Exercise 2

Class:5_____ Name: _____() Date:_____

Read the following weather report.

Good evening. This is Alan Wan from ABC TV.

Today the weather was cloudy at first but it turned to be fine in the afternoon. Temperatures rose to about 28 degrees Celsius over some parts of the New Territories.

As tonight's weather chart shows that there will be wind blowing to Hong Kong from the east.

5

Locally, it was fine in the afternoon and the temperatures were a couple degrees higher than yesterday. Today's highest temperature was 24 degrees, and the relative humidity was between 84 to 90 percent. Winds turned out to be light today. At six o'clock, at the Hong Kong Observatory the **current** air temperature is 21 degrees and the relative humidity is 86 percent. No rainfall has been recorded since last night. Let's look at Freddy for the forecast tomorrow.

10

It will be mostly cloudy tonight, with sunny periods tomorrow. Temperatures will be about 19 to 23 degrees.

15

However, the sunny weather will not last long. Since there is a typhoon coming, the weather will turn bad at the beginning of next week. Typhoon Signal No.1 may be hoisted. The rainstorm warning and thunderstorm warning may be issued too. There may be landslips and floods at anytime.

Anyway, enjoy this sunny weekend first.

20

Hope you'll have a nice weekend.
